

Touchless Giving (TipTap)

Who carries cash anymore? With TipTap, you don't need to! Simply tap your card or phone to the reader to give instantly via credit, debit, Apple Pay or Google Pay. Could it be any easier? Just listen for a beep followed by a pause and then another beep, and you've successfully given! If you hear a beep followed by two beeps, it wasn't approved. Try again, or with another card!

Why TipTap

As cash disappears, TipTap provides a simple, fast, effective, fun, and secure way to make your donation.

What kind of payment does TipTap use?

TipTap accepts all the major contactless payment solutions. Visa Mastercard, Interact, Apple Pay, Google Pay... simply tap your card or mobile wallet to the device to make your donation!

How safe is it?

We collect no personal information, and card information is encrypted and transported on a private LTE network to the TipTap server, making it as secure (or more secure) as the big banks. The device cannot be hacked, as any change in the firmware automatically transmits a tamper signal and shuts down the device. The inside is sealed with acrylic, making it impossible to compromise the hardware.

Is TipTap tax deductible?

No, gifts given through TipTap are anonymous, and therefore we are unable to issue tax receipts for them.
